

Work Proposal Heating Oil Tank Soil Sampling Payment Agreement Form

Date:

Table with 2 columns: Prepared for, Site Address

1.) Description of Work

Auger for two (2) samples at the fill and vent ends of the tank. Auger locations are to be approximately 6 inches from each end of the Tank and approximately 12 inches below the bottom of the Tank. Samples will be submitted to an independent, DEQ certified Laboratory for NWTPH-Dx or H.C.I.D. analysis. A written report on Sampling activities and results is prepared and submitted to the interested parties.

Call for price \$_____.

NOTE: The Sampling price above may be applied to the final price of a Tank Decommissioning or other work we perform on the Tank being sampled. Augurings are to be no more than 7 feet in depth in order to reach the tank bottom and that there are no obstructions such as rocks or debris that interfere with the auguring. Any such conditions may constitute a change order. Unsuccessful augerings due to circumstances beyond the control of the contractor, constitute a service fee of \$75.00.

I understand that sampling may reveal the release of oil in the ground and that this release requires reporting to the DEQ by Universal Applicators, Inc. within 72 hours of its discovery. I understand that DEQ will require cleanup action by a remedial action contractor.

Offered by: L. Truman _____
